

OPTIONS

Colours:

Yellow, Black or Grey

Bespoke:

Any RAL / BS colour*

Dimensions:

Manufactured on a nominally 3mm thick GRP profile

U shaped profile:

Length : 3000 mm
Cross section sizes (internal): 20 mm | 25 mm | 30 mm | 35 mm | 40 mm

Square section profile:

Length: 3000 mm
Cross section sizes (internal): 20 mm | 25 mm | 30 mm | 35 mm | 40 mm

Additional Options:

Custom cross section sizes available*

Choice of colour*

Choice of grit size*

Cut to exact sizes prior to delivery

Recommended adhesive available from stock

*Minimum order quantities may apply. Please contact us for further information

SPECIFICATION

Profile & resin coatings:

High quality isophthalic polyesters

Grit:

Refined aluminium oxide

Hardness:

9.5 moh / 2200 knoop diamond

Suitable traffic:

Foot

Can be fixed to:

Steel, aluminium, wood & fibreglass

Fixing methods:

Single part sealant/adhesive

BENEFITS

- > highly effective anti-slip safety surface
- > long lasting & durable
- > suitable for all environments, exterior or interior
- > refined, extra-hard aluminium oxide granules give superior performance & wear characteristics, industrial (grade 16, medium/coarse)
- > light weight profiles add insignificant load to existing structures
- > rapid & easy installation – adhesives/sealant available from stock
- > resistant to a wide range of chemicals (full details available)
- > full range of RAL & BS colours available to order
- > easily cleanable
- > rapid delivery: bespoke made typically within 10 days of order*
- > free cutting service*

*subject to order type & size

APPLICATIONS

Typical applications:

- Portable extending ladders & steps
- Industrial caged ladders
- Fixed access ladders - e.g. harbours & water treatment works

DESCRIPTION

A nominally 2mm thick, tough GRP profiled cover, coated in a combination of premium quality aluminium oxide & resin components gives the Ladder Rung Cover product a highly effective and durable Anti-slip surface that will withstand the rigours of all industrial & commercial environments. Designed specifically to reduce the risk of slipping on metal and wooden ladder rungs, they are a hard wearing and highly effective solution especially in wet conditions. The products are fixed using a single part adhesive/sealant that bonds and seals the cover, preventing ingress of moisture. The Ladder Rung Cover profiles may be cut and finished to specified sizes prior to delivery for ease of installation or can be cut on site using a diamond tipped tool.

The product range features a choice of two profile shapes with a range of common sizes to suit most industrial ladders.

Ladder Rung Covers are a 'made to order' bespoke solution available with short lead times direct from our UK manufacturing facilities.
